Endoscopes made their debut in the gynecological world as magic wands. Laparoscopy has now become almost synonymous with gynaecological surgery and has made laparotomy almost obsolete. Today, the gynaecologist cannot imagine functioning without this elegant tool of the trade. This challenging discipline requires skill, patience and perseverance. This workshop provides a unique opportunity to witness the masters exhibit their craft live and to interact with them.

**About the workshop:**

**LAPAROSCOPY WORKSHOP**

**THEME:** Uterus & Beyond

Endoscopes made their debut in the gynecological world as magic wands. Laparoscopy has now become almost synonymous with gynaecological surgery and has made laparotomy almost obsolete. Today, the gynaecologist cannot imagine functioning without this elegant tool of the trade. This challenging discipline requires skill, patience and perseverance. This workshop provides a unique opportunity to witness the masters exhibit their craft live and to interact with them.
